

ADVANCE PRODUCTS & SYSTEMS, INC.

Engineering Specification for the:
APS POLYETHYLENE CASING SPACER

Factory manufactured casing spacers shall be installed on all carrier pipes passing through a casing pipe.

Wooden skids will NOT be allowed as an alternative.

Casing spacers will be Model CI as manufactured by Advance Products & Systems, Inc., Lafayette, LA.

Casing spacers will be bolt on style with a shell made of two (2) segments thru 12" NPS and multiple segments for 14" NPS and above. The spacers shall be manufactured from injection molded, high density polyethylene with a minimum compression strength of 3200 psi. All hardware to be electro-plated steel.
