

APS GAL-VO-PLAST® WALL SLEEVE

Engineering Specification
Rev. 092625
Page 1 of 1

The Gal-Vo-Plast® wall sleeve shall be standard schedule 40 wall thickness. The standard length shall be 12 inches; however, this can be customized to any size wall. Each wall sleeve is manufactured with a two-inch-wide water stop that anchors the sleeve to prevent thrust movement and insure positive water sealing. APS standard water stops are centered, unless otherwise specified.

Coating shall be proprietary Gal-Vo-Plast® fusion bonded polymer powder with 10 mils or more, applied to oven heated wall sleeves via spraying method.

Gal-Vo-Plast® wall sleeves shall be Model GPWSW as manufactured by Advance Products & Systems, LLC., Scott, Louisiana.
