

Isolating Gaskets

Flange Isolating Gasket Kits

Sizes: 1/2" - 144"

- Electrical isolation that prevents galvanic corrosion and provides leak-proof sealing at flange connections
- Materials: Durabla, NEMA Grade G-3, G-7, G-10, G-11
- Duplex four-seal G-10 gasket certified to NSF-61 available

Flange Protection

Sizes: 1/2" - 144"

Kleerband® Flange Protector

- Prevents corrosion and foreign material from lodging between flange faces
- Clear polymer band allows visual inspection of flange cavity
- Features: Airtight D-seal, grease injection fitting, relief vent plug

Kleergel® Corrosion Inhibitor Grease

- Non-flammable, non-staining, non-toxic synthetic grease
- Temperature Range: -50°F to 375°F
- Properties: 100% waterproof, dielectric

Radolid® Nut & Bolt Protection Caps

- Reusable caps manufactured from UV-resistant polyethylene that prevent fastener corrosion
- Sizes: 1/4" - 3/4" bolt diameter

Pipe Support

UBolt-Cote® & Atlas Pipe Support® Pads

- Corrosion-resistant polymer-coated U-bolts for cathodic protection systems
- Pads provide minimal pipe contact, eliminating crevice corrosion
- Features: Zero water absorption, UV protection

Innerlynx® & Wall Sleeves

Sizes: 1/2" - 144"
(21 sizes available)

Innerlynx®

- Modular Mechanical Seals
- Absorbs vibration, shock, and sound while sealing penetrations
- Electrically isolates carrier pipe from penetrated structure
- Materials: EPDM, nitrile, silicone, and UL three-hour fire-rated

Infinity® Wall Sleeves

- Lightweight HDPE wall penetration barriers for floors, walls, and ceilings
- Designed for circular penetrations with reliable sealing performance
- Sizes: 2" - 25" | Material: HDPE
- Withstands 40 psig when combined with Innerlynx® seals

Gal-Vo-Plast® Wall Sleeves

- Superior seal vs. core drilled holes
- Proprietary coating for enhanced durability and longer service life
- Sizes: 2" - 120" diameter
- Materials: Stainless steel, carbon steel, custom lengths available

External Mount Split Wall Sleeves

- Designed for sealing pipe penetrations in atypical scenarios
- Can be installed after concrete

Materials: Gal-Vo-Plast® coated, stainless, or plain steel

End Seals

Casing End Seals

- Flexible 1/8" thick synthetic rubber seals for carrier-to-casing closure
- Fits any pipe size combination
- Styles Available: AC Pull-On, AW Wrap-Around, AZ Zipper, AM Molded, AMCE Cone, APC Cluster
- Secured with stainless banding

Industrial & Mechanical Applications

APS products support piping and mechanical systems across a wide range of industrial facilities and equipment environments.

Typical Applications Include:

- Manufacturing and processing facilities
- Mechanical rooms and HVAC systems
- Pump and equipment skids
- Industrial fluid handling systems
- Power generation and utility plants
- Equipment foundations and structural supports
- Metered and instrumented piping systems
- Maintenance, repair, and retrofit projects

Engineered for Indus/Mech Performance

APS solutions are designed to:

- Prevent corrosion and metal-to-metal contact
- Maintain sealing integrity in mechanical systems
- Improve inspection and maintenance accessibility
- Reduce downtime and unplanned repairs
- Extend equipment service life
- Support compliance and safety standards

Reliable. Industrial-Grade Protection. Proven.

Common Industrial & Mechanical Challenges

- Corrosion under pipe supports and at contact points
- Vibration-related wear and seal failure
- Metal-to-metal contact causing premature deterioration
- Leakage at penetrations and flange connections
- Galvanic corrosion between dissimilar metals
- Limited access for inspection and maintenance
- Downtime caused by seal or support failure
